Duhok, Kurdistan Region, Iraq

LANGUAGES

Kurdish (Kurmanji, Badini) · native

Kurdish (Sorani)

Arabic

English

SKILLS

JavaScript · TypeScript · React

Electron · SQLite · Firebase

Flutter · Dart · PWA

Python · C++ · SQL

UI design · branding · video ads

Thermal printers · barcode systems

PROFILE

Computer Science graduate from the University of Duhok. I build Kurdish-first apps that real shops use every day, and I design the ads that sell them. Comfortable from the database to the receipt printer to the Instagram post.

EXPERIENCE

Founder · developer & designer

AVAKER

Design, build and advertise apps, websites and campaigns for local businesses in Kurdistan.

Developer · own product

Lolav Market

Kurdish POS and inventory system in daily use at a supermarket. React, Electron, SQLite and Firebase sync; silent receipt and label printing; phone version.

Developer · client project

ARMANJ

Cashier and stock system with admin and cashier roles, CODE128 labels, WhatsApp receipts and a live phone dashboard. TypeScript, Tailwind, i18next.

Product & developer

Bazarê Me

Marketplace for Kurdistan with reviewed ads and safe chat, plus a launch campaign in three languages.

Developer

Smaller tools

Lolav Prices (PWA price scanner), Payroll Desk (attendance and pay), an Arabic accounting system and a Flutter edition of Lolav.

EDUCATION

Bachelor of Science

Computer Science · University of Duhok

Programming (C++), object-oriented design, data structures and algorithms, databases and SQL, networks, operating systems, software engineering, web and mobile development, AI with Python.
